

Brenzavvy at Mark Cuban Cost Plus Drugs

SmithRx is bringing members with type 2 diabetes a lower cost SGLT2 inhibitor alternative. Brenzavvy is now available to SmithRx members at no cost at Mark Cuban Cost Plus Drugs for employer groups enrolled in the Connect 360 Diabetes Non-Insulin (DNI) Program.

What is Brenzavvy?

Brenzavvy (bexagliflozin), pronounced “bren-ZA-vee”, is a Sodium-Glucose Cotransporter 2 (SGLT2) inhibitor used in adults with type 2 diabetes along with diet and exercise. Brenzavvy is safe and effective at lowering hemoglobin A1c and fasting blood sugar in adults with type 2 diabetes. Brenzavvy is an oral tablet taken once daily.

What is a SGLT2 inhibitor?

SGLT2 inhibitors work by causing excess sugar in the blood to be released from the body through the urine. By urinating out excess sugar, this helps to lower hemoglobin A1c and blood sugar levels which is important for members with type 2 diabetes. Brenzavvy and other SGLT2 inhibitors are not recommended to decrease blood sugar in patients with type 1 diabetes.

How much will I need to pay for Brenzavvy through this program?

Because your employer is enrolled in the Connect 360 Diabetes Non-Insulin (DNI) program, the cost of Brenzavvy will be fully covered by your employer and you will not have a copay or shipping fee.

Where can I fill my Brenzavvy prescription through this program?

Through this program, Brenzavvy can be filled using your SmithRx prescription benefit card through Mark Cuban Cost Plus Drugs at no cost to you. Ask your provider to send the prescription to Mark Cuban Cost Plus Drugs. Create an account and find answers to common questions about Mark Cuban Cost Plus Drugs, orders, and shipping at: costplusdrugs.com/faq/

What are the other benefits of Brenzavvy?

Clinical studies have shown that Brenzavvy can support weight loss and reduce blood pressure.

What are the side effects of Brenzavvy?

Similar to other SGLT2 inhibitors, the most common side effects of Brenzavvy include increased urination, urinary tract infections, and genital yeast infections. Discuss these potential side effects and warning signs with your healthcare provider. Let your provider know if you experience any of the warnings or side effects.
